## Chapter 1

# VERSEM

Initial, empty README for the VERsatile Spectral Element Method.

## Chapter 2

# Hierarchical Index

### 2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

TestCase	
test_gll.TestGLL . . . . .	<a href="#">7</a>

## Chapter 3

# Class Index

### 3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">test_gll.TestGLL</a> . . . . .	7
--	---

## Chapter 4

# Class Documentation

### 4.1 test\_gll.TestGLL Class Reference

Inheritance diagram for test\_gll.TestGLL:

#### Public Member Functions

- def [testGLLPointsAndWeights2](#) (self)
- def [testLagrangePoly](#) (self)

#### 4.1.1 Detailed Description

Testing functions of the gll\_library  
- Gauss-Lobatto-Legendre points and weights  
- Lagrange Polynomial evaluator

#### 4.1.2 Member Function Documentation

##### 4.1.2.1 testGLLPointsAndWeights2()

```
def test_gll.TestGLL.testGLLPointsAndWeights2 (  
    self )
```

Tests gll\_pw() from gll\_library whether points and weights are correct. Note that it is almost equal due to the fact that the points are hardcoded.

#### 4.1.2.2 testLagrangePoly()

```
def test_gll.TestGLL.testLagrangePoly (
    self )
```

Tests lagrange() from the gll\_library

The documentation for this class was generated from the following file:

- tests/test\_gll.py

# Index
